Seqera Co-Scientist Webinar is available on-demand. Watch now Seqera Co-Scientist

seqera

Pipelines Showing all 81

Sort by: Stars

Search pipelines...

nf-core/rnaseq

RNA sequencing analysis pipeline using STAR, RSEM, HISAT2 or Salmon with gene/isoform counts and extensive quality control.

nextflow pipeline workflow nf-core + 2 more

☆ 786 198 KB Updated about 2 years ago

Launch

nf-core/sarek

Analysis pipeline to detect germline or somatic variants (pre-processing, variant calling and annotation) from WGS / targeted sequencing

nextflow pipeline workflow nf-core + 16 more

☆ 340 470 KB Updated about 2 years ago

Launch

nf-core/mag

Assembly and binning of metagenomes

nextflow pipeline workflow nf-core + 9 more

☆ 182 260 KB Updated about 2 years ago

Launch

nf-core/chipseq

ChIP-seq peak-calling, QC and differential analysis pipeline.

nextflow pipeline workflow nf-core + 5 more

☆ 173 155 KB Updated about 2 years ago

Launch

nf-core/scrnaseq

A single-cell RNAseq pipeline for 10X genomics data

nextflow pipeline workflow nf-core + 9 more

Seqera Co-Scientist Webinar is available on-demand. Watch now Seqera Co-Scientist

seqera

nextflow pipeline workflow nf-core + 2 more

☆ 161 198 KB Updated about 2 years ago

Launch

nf-core/ampliseq

Amplicon sequencing analysis workflow using DADA2 and QIIME2

nextflow pipeline workflow nf-core + 15 more

☆ 157 450 KB Updated about 2 years ago

Launch

nf-core/nanoseq

Nanopore demultiplexing, QC and alignment pipeline

nextflow pipeline workflow nf-core + 4 more

☆ 144 161 KB Updated about 2 years ago

Launch

nf-core/rnafusion

RNA-seq analysis pipeline for detection of gene-fusions

nextflow pipeline workflow nf-core + 5 more

☆ 130 105 KB Updated about 2 years ago

Launch

nf-core/methylseq

Methylation (Bisulfite-Sequencing) analysis pipeline using Bismark or bwa-meth + MethylDackel

nextflow pipeline workflow nf-core + 8 more

☆ 130 127 KB Updated about 2 years ago

Launch

nf-core/fetchngs

Pipeline to fetch metadata and raw FastQ files from public databases

nextflow pipeline workflow nf-core + 7 more

☆ 125 76 KB Updated about 2 years ago

Launch

nf-core/viralrecon

Assembly and intrahost/low-frequency variant calling for viral samples

nextflow pipeline workflow nf-core + 15 more

Seqera Co-Scientist Webinar is available on-demand. Watch now Seqera Co-Scientist

seqera

nextflow workflow polygenic-scores polygenic-risk-scores + 6 more

☆ 96 133 KB Updated about 2 years ago

Launch

nf-core/taxprofiler

Highly parallelised multi-taxonomic profiling of shotgun short- and long-read metagenomic data

nextflow pipeline workflow nf-core + 12 more

☆ 92 221 KB Updated about 2 years ago

Launch

epi2me-labs/wf-human-variation

☆ 79 192 KB Updated about 2 years ago

Launch

nf-core/raredisease

Call and score variants from WGS/WES of rare disease patients.

nextflow pipeline workflow nf-core + 8 more

☆ 72 374 KB Updated about 2 years ago

Launch

nf-core/smrnaseq

A small-RNA sequencing analysis pipeline

nextflow pipeline workflow nf-core + 2 more

☆ 68 133 KB Updated about 2 years ago

Launch

epi2me-labs/wf-single-cell

☆ 65 82 KB Updated about 2 years ago

Launch

nf-core/cutandrun

Analysis pipeline for CUT&RUN and CUT&TAG experiments that includes QC, support for spike-ins, IgG controls, peak calling and downstream analysis.

nextflow pipeline workflow nf-core + 4 more

☆ 65 240 KB Updated about 2 years ago

Launch

Seqera Co-Scientist Webinar is available on-demand. Watch now Seqera Co-Scientist

seqera

genepi/nf-gwas

A nextflow pipeline to perform state-of-the-art genome-wide association studies.

nextflow singularity gwas regenie + 2 more

☆ 56 68 KB Updated about 2 years ago

Launch

nf-core/hlatyping

Precision HLA typing from next-generation sequencing data

nextflow pipeline workflow nf-core + 7 more

☆ 52 67 KB Updated about 2 years ago

Launch

nf-core/pangenome

Renders a collection of sequences into a pangenome graph.

nextflow pipeline workflow nf-core + 1 more

☆ 49 85 KB Updated about 2 years ago

Launch

nf-core/differentialabundance

Differential abundance analysis for feature/ observation matrices from platforms such as RNA-seq

nextflow pipeline workflow nf-core + 10 more

☆ 45 133 KB Updated about 2 years ago

Launch

NBISweden/pipelines-nextflow

A set of workflows written in Nextflow for Genome Annotation.

nextflow workflow genome-annotation

☆ 43 56 KB Updated about 2 years ago

Launch

nf-core/airrflow

B-cell and T-cell Adaptive Immune Receptor Repertoire (AIRR) sequencing analysis pipeline using the Immcantation framework

nextflow pipeline workflow nf-core + 5 more

☆ 43 217 KB Updated about 2 years ago

Launch

Seqera Co-Scientist Webinar is available on-demand. Watch now Seqera Co-Scientist

seqera

nf-core/proteinfold
Protein 3D structure prediction pipeline

nextflow pipeline workflow nf-core + 5 more

☆ 41 81 KB Updated about 2 years ago

Launch

nf-core/demultiplex
Demultiplexing pipeline for sequencing data

nextflow pipeline workflow nf-core + 5 more

☆ 34 118 KB Updated about 2 years ago

Launch

Arcadia-Science/metagenomics
A Nextflow workflow for QC, evaluation, and profiling of metagenomic samples using short- and long-read technologies

☆ 33 67 KB Updated about 2 years ago

Launch

nf-core/mhcquant
Identify and quantify MHC eluted peptides from mass spectrometry raw data

nextflow pipeline workflow nf-core + 5 more

☆ 29 162 KB Updated over 2 years ago

Launch

nf-core/quantms
Quantitative mass spectrometry workflow. Currently supports proteomics experiments with complex experimental designs for DDA-LFQ, DDA-Isobaric and DIA-LFQ quantification.

nextflow pipeline workflow nf-core + 8 more

☆ 26 152 KB Updated about 2 years ago

Launch

Arcadia-Science/seqqc
A Nextflow pipeline to identify quality control issues with new sequencing data.

☆ 26 39 KB Updated over 2 years ago

Launch

Seqera Co-Scientist Webinar is available on-demand. Watch now Seqera Co-Scientist

seqera

nf-core/isoseq

Genome annotation with PacBio Iso-Seq. Takes raw subreads as input, generate Full Length Non Chemiric (FLNC) sequences and produce a bed annotation.

nextflow pipeline workflow nf-core + 5 more

☆ 23 76 KB Updated about 2 years ago

Launch

nf-core/crisprseq

A pipeline for the analysis of CRISPR edited data. It allows the evaluation of the quality of gene editing experiments using targeted next generation sequencing (NGS) data (`targeted`) as well as the discovery of important genes from knock-out or activation CRISPR-Cas9 screens using CRISPR pooled DNA (`screening`).

nextflow pipeline workflow nf-core + 4 more

☆ 21 131 KB Updated about 2 years ago

Launch

epi2me-labs/wf-clone-validation

☆ 20 68 KB Updated about 2 years ago

Launch

epi2me-labs/wf-alignment

☆ 17 50 KB Updated about 2 years ago

Launch

nf-core/viralintegration

Analysis pipeline for the identification of viral integration events in genomes using a chimeric read approach.

nextflow pipeline workflow nf-core + 5 more

☆ 15 100 KB Updated about 2 years ago

Launch

nf-core/metaboigniter

Pre-processing of mass spectrometry-based metabolomics data with quantification and identification based on MS1 and MS2 data.

nextflow pipeline workflow nf-core + 6 more

☆ 15 174 KB Updated about 2 years ago

Launch

Seqera Co-Scientist Webinar is available on-demand. Watch now Seqera Co-Scientist

seqera

☆ 14 77 KB Updated about 2 years ago

Launch

nf-core/genomeassembler

nextflow pipeline workflow nf-core

☆ 14 100 KB Updated over 2 years ago

Launch

nf-core/nascent

Nascent Transcription Processing Pipeline

nextflow pipeline workflow nf-core + 6 more

☆ 13 114 KB Updated about 2 years ago

Launch

nf-core/bamtofastq

Converts bam or cram files to fastq format and does quality control.

nextflow pipeline workflow nf-core + 3 more

☆ 13 65 KB Updated about 2 years ago

Launch

nf-core/phaseimpute

☆ 12 263 KB Updated about 2 years ago

Launch

nf-core/nanostring

An analysis pipeline for Nanostring nCounter expression data.

nextflow pipeline workflow nf-core + 2 more

☆ 12 78 KB Updated about 2 years ago

Launch

nf-core/metatdenovo

Assembly and annotation of metatranscriptomic or metagenomic data for prokaryotic, eukaryotic and viruses.

nextflow pipeline workflow nf-core + 5 more

☆ 12 116 KB Updated about 2 years ago

Launch

Seqera Co-Scientist Webinar is available on-demand. Watch now Seqera Co-Scientist

seqera

☆ 11 95 KB Updated about 2 years ago

nf-core/phageannotator

Pipeline for identifying, annotation, and quantifying phage sequences in (meta)-genomic sequences.

nextflow pipeline workflow nf-core

☆ 9 182 KB Updated about 2 years ago

Launch

sanger-tol/readmapping

Nextflow DSL2 pipeline to align short and long reads to genome assembly. This workflow is part of the Tree of Life production suite.

nextflow pipeline genomics read-alignment

☆ 8 52 KB Updated over 2 years ago

Launch

epi2me-labs/wf-cnv

☆ 8 41 KB Updated about 2 years ago

Launch

qbic-pipelines/vcftomaf

☆ 7 64 KB Updated about 2 years ago

Launch

Joon-Klaps/viralgenie

Detect iSNV and construct whole viral genomes from metagenomic samples

nextflow ngs fastq epidemiology + 3 more

☆ 7 251 KB Updated about 2 years ago

Launch

nf-core/pixelator

Pipeline to generate Molecular Pixelation data with Pixelator (Pixelgen Technologies AB)

nextflow pipeline workflow nf-core + 6 more

☆ 6 74 KB Updated about 2 years ago

Launch

nf-core/molkart

Seqera Co-Scientist Webinar is available on-demand. Watch now Seqera Co-Scientist

seqera

nf-core/metapep
From metagenomes to epitopes and beyond

nextflow pipeline workflow nf-core

☆ 6 102 KB Updated about 2 years ago

Launch

genomic-medicine-sweden/nallo

☆ 5 181 KB Updated about 2 years ago

Launch

nf-core/createpanelrefs
Generate Panel of Normals, models or other similar references from lots of samples

nextflow pipeline workflow nf-core

☆ 4 112 KB Updated over 2 years ago

Launch

nf-core/mcmicro
An end-to-end processing pipeline that transforms multi-channel whole-slide images into single-cell data.

nextflow pipeline workflow nf-core + 12 more

☆ 4 105 KB Updated about 2 years ago

Launch

nf-core/variantbenchmarking
A nextflow variant benchmarking pipeline - premature

nextflow pipeline workflow nf-core + 4 more

☆ 4 148 KB Updated about 2 years ago

Launch

nf-core/rangeland
Pipeline for remotely sensed imagery. The pipeline processes satellite imagery alongside auxiliary data in multiple steps to arrive at a set of trend files related to land-cover changes.

nextflow pipeline workflow nf-core + 6 more

☆ 3 51 KB Updated about 2 years ago

Launch

nf-core/seqinspector

Seqera Co-Scientist Webinar is available on-demand. Watch now Seqera Co-Scientist

seqera

seqeralabs/nf-chai

A bioinformatics pipeline for running the Chai-1 protein prediction algorithm on an input set of protein sequences in FASTA format

protein-prediction pipeline

☆ 3 10 KB Updated over 1 year ago

Launch

epi2me-labs/wf-aav-qc

☆ 2 53 KB Updated over 2 years ago

Launch

nf-core/reportho

nf-core pipeline for comparative analysis of ortholog predictions

☆ 2 97 KB Updated about 2 years ago

Launch

qbic-pipelines/variantmtb

☆ 2 57 KB Updated over 2 years ago

Launch

FredHutch/prokka-nf

Nextflow workflow running prokka for bacterial genome annotation

☆ 2 6 KB Updated about 3 years ago

Launch

sanger-tol/sequencecomposition

Nextflow pipeline to extract statistics from a genome about its sequence composition

nextflow pipeline genomics kmer-frequency-count + 2 more

☆ 2 24 KB Updated almost 3 years ago

Launch

sanger-tol/insdcdownload

Nextflow pipeline to download assemblies from INSDC and add them to the Tree of Life directories

nextflow pipeline genomics download + 1 more

☆ 1 25 KB Updated almost 3 years ago

Launch

Seqera Co-Scientist Webinar is available on-demand. Watch now Seqera Co-Scientist

seqera

BCCDC-PHL/basic-sequence-qc
Generate some basic quality control statistics on an arbitrary set of illumina fastq sequence files.

genomics next-generation-sequencing quality-control bioinformatics-pipeline

☆ 1 2 KB Updated over 3 years ago

Launch

nf-core/spinningjenny
Pipeline for simulating the first industrial revolution using Agent Based Models.

nextflow pipeline workflow nf-core

☆ 1 72 KB Updated about 2 years ago

Launch

FredHutch/interop-nf
InterOp QC Reporting - Nextflow

nextflow illumina

☆ 0 3 KB Updated over 3 years ago

Launch

annotation-cache/downloadvepcache
Download VEP cache for annotation-cache

☆ 0 25 KB Updated about 2 years ago

Launch

FredHutch/pw-bulk-rna-immune-clonotypes
Analysis of T-/B-cell clonotypes from bulk RNA sequencing data

☆ 0 9 KB Updated almost 4 years ago

Launch

FredHutch/subset-fastq-nf
Subset a collection of FASTQ files

☆ 0 2 KB Updated almost 3 years ago

Launch

annotation-cache/downloadsnpeffcache
Download SnpEff cache for annotation-cache

Seqera Co-Scientist Webinar is available on-demand. Watch now Seqera Co-Scientist

seqera

Intersects Strelka2 and Mutect2 VCF files

☆ 0 31 KB Updated about 2 years ago

Launch

FredHutch/multi-fastqc-nf

Workflow running FastQC across multiple files

☆ 0 3 KB Updated over 4 years ago

Launch

FredHutch/sra-human-scrubber-nf

Apply the NCBI human read removal tool (HRRT) to mask human reads from metagenomic data

☆ 0 3 KB Updated over 3 years ago

Launch

Seqera Co-Scientist Webinar is available on-demand. Watch now Seqera Co-Scientist

seqera
